

Linkspreed Web4

SHAPE THE BEST POSSIBLE FUTURE @LINKSPREED

Linkspreed

Your Web – Your Use Case – Your Future

FRANCHISE

With Linkspreed, we are building the largest decentralized network of social networks.

L2B

With L2B, we are developing high-quality business software for franchise partners.

L3 & LAAS

L3 & LaaS are extensions of our product pipeline for large customers and additional services.

Web4

A new way to define the web.

PROBLEM WEB 1

There are hardly any user interaction possibilities.

PROBLEM WEB 2

Large, central monopolies rule the internet and your data.

PROBLEM WEB 3

Decentralization and blockchain have gained a bad reputation through crypto.

Social Media IS DEAD

Social media is becoming increasingly unattractive, focusing solely on monetization, and criticism of "mindless scrolling," algorithms, data privacy, filters, etc., is gradually growing.

BIRTH of Linkspreed's Web4

Zero

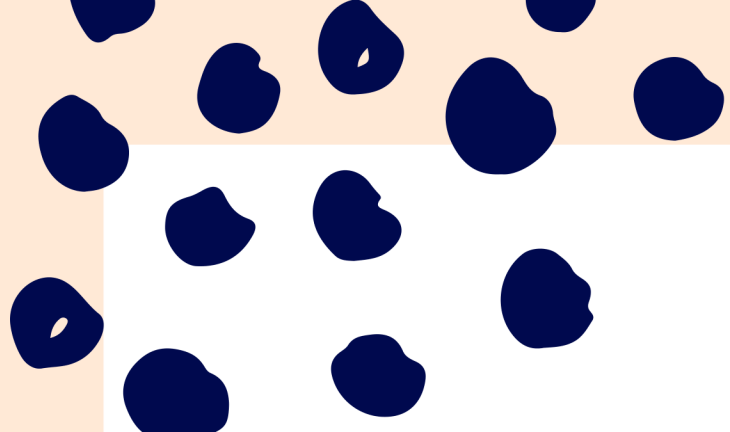

Shape

To

The

Hero

Future

1+1

We combine the advantages of platforms like social media with the latest technology and place these social networks in the hands of businesses and end customers.

COMPANY

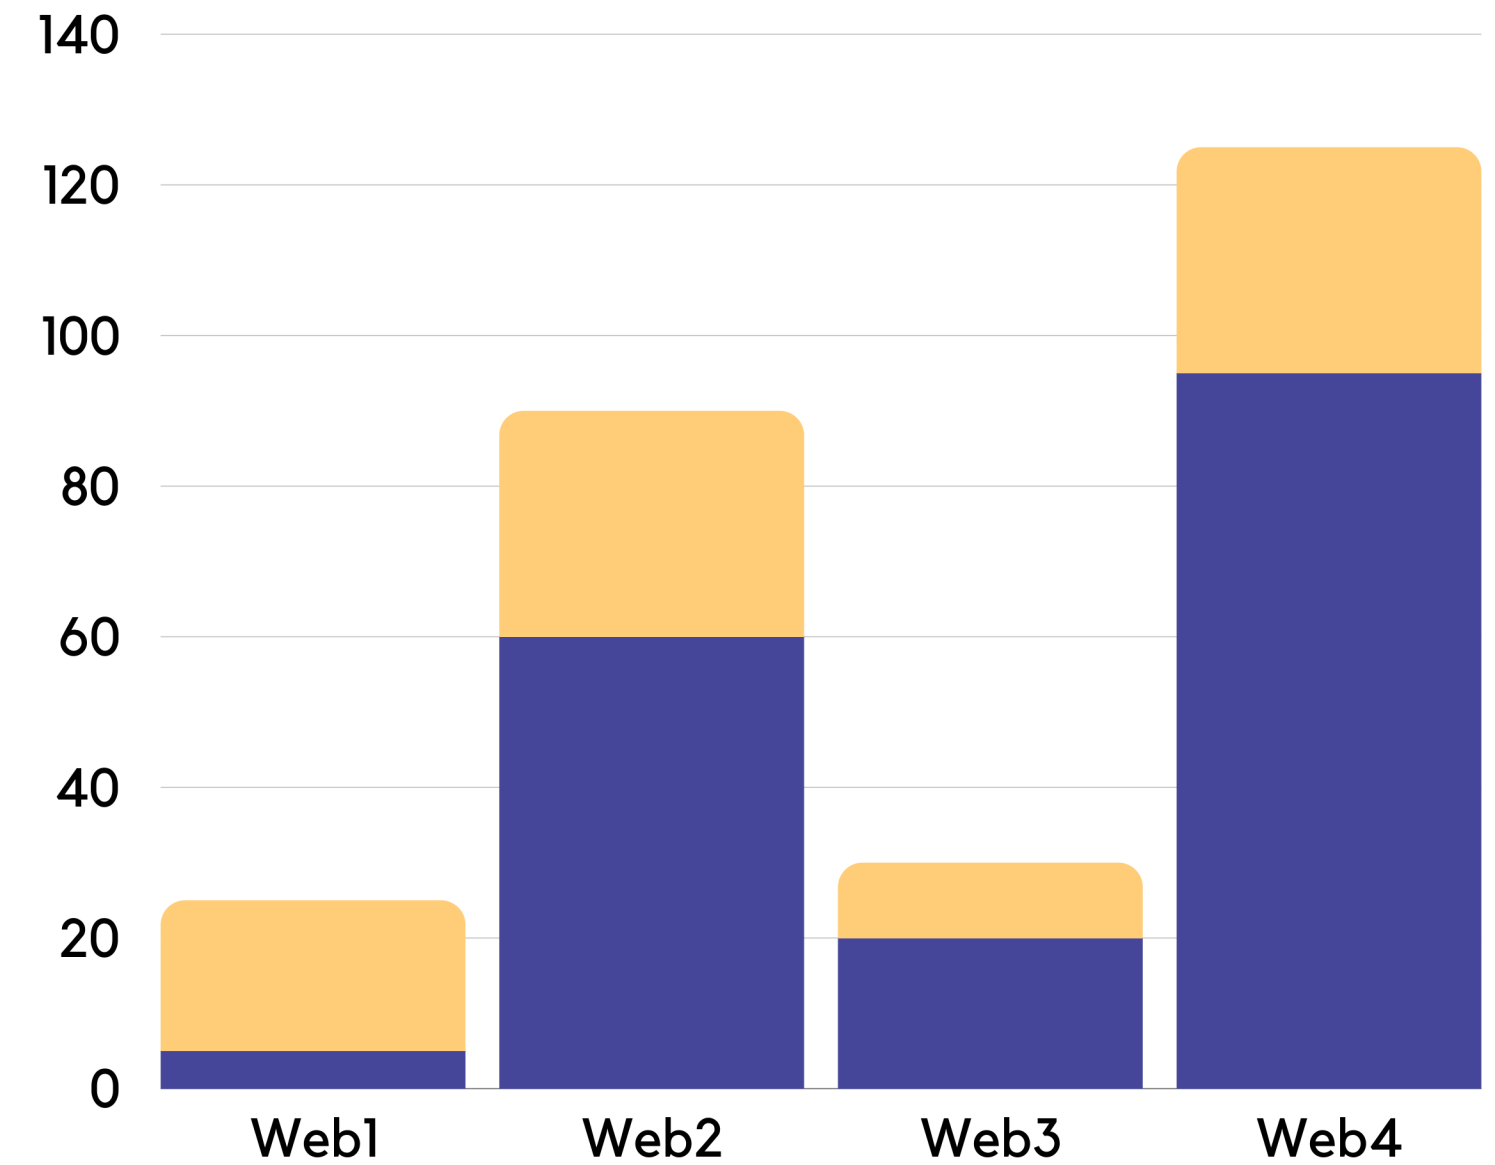

Companies and organizations can build their own social network for their specific topics affordably, quickly, and easily.

YOU + ME

As end users, we finally benefit from content that interests us and a user environment that shares the same interests as we do.

Acceptance

We conducted a survey on the potential acceptance of Web4 in society compared to the three existing webs. The result is promising.

Control

Web4 is the web of communities – and anyone who wants to build a community is in the right place with us!

COMMUNITY

Our vision at Linkspreed is thousands of decentralized communities!

SHAPER +

Anyone who chooses to build a network for a specific community or region is a "FutureShaper"!

Web4 Market Size

Our market knows no bounds!

Individuals

Anyone can build a social network

Companies

Social networks managed by businesses

Organizations

Organizations have their own social network

THE team
